Method and sources

Source for this hospital:

https://www.memorialcare.org/sites/default/files/_images/content/Patient-Financial-Services/330687414_memorialcare-orange-coast-medic

(file dated 2026-04-01).

- Rates are payer-specific negotiated charges in dollars under a fee-schedule methodology, as published in each hospital's machine-readable file. Case rates, per diems and percent-of-charges rates are excluded.
- Commercial plans only. Medicare Advantage, Medicaid managed care and exchange plans are classified from the published plan names and excluded, so rates from different lines of business are never mixed.
- Where a hospital lists several commercial plans for an insurer, or several dollar rates for one plan, its rate is the median across them, so it can fall between two lines in the file.
- Peer rates are the same insurer's commercial rates for the same service at other hospitals within 60 or 120 miles (widened from 60 to 120 miles only where needed). Each distinct rate counts once, because hospitals in one system usually share a contract, and a rate identical to yours is left out for the same reason. A comparison needs at least 5 distinct peer rates.
- Facility charges only: professional fees (for example a radiologist's read) are a different price for the same code and are excluded. Where a file does not state which a line is, it is read from the line's UB-04 revenue code (0960-0989 are professional fees); lines with neither are excluded. Drug codes are excluded, as is any insurer rate the file also lists under percent-of-charges or other non-dollar terms for the same service.
- Placeholder and implausible values (for example $1 entries) are removed before comparison.

This report is built from public data and is provided for information. It is not legal or financial advice. Confirm figures against your own contracts before relying on them in a negotiation.
